SUPPLIES

SOIL: Mixed and sterilized. We can mix this soil for the plants you need it for. 1 lb. fills a standard 4" pot. 5 lbs. 60c; 10 lbs. \$1.10; 25 lbs. \$2.50.

SOIL CONDITIONER: We have this product where you have your own soil. (Please note): for your own soil mix for African Violets, use this product half and half by measure, not by weight. If your soil is very rich cut down on this product accordingly. 5 lbs. 60c; 10 lbs. \$1.10; 25 lbs. \$2.50.

N.N.R.O. INSECTICIDE: This spray is fine for all house plants as well as all garden plants, safe for ferns which cannot use so many sprays without serious injury. Use as instructed below:

Directions for Making Thorough Kill of Insects on Plants with Spray Solution

It is not necessary to employ this method unless there is a very bad infection of mite or mealy bug.

Prepare a pail of cool water, add N.N.O.R.—2 teaspoonfuls to each gallon of water, stir until spray is thoroughly dissolved in water. Have enough water to completely cover the plant. Leave the plant in the water until the soil quits bubbling, 5 or 10 minutes does not injure the plant. Remove plant and dry in shade; do not allow the sun to strike the leaves. Treat badly infested plants 3 times one week apart. Then spray once every two weeks, spray will sometimes spot the flowers, so it is best to avoid spraying the blossoms. *69 100 16 215*

This spray has a very fine oil base so be sure to shake or stir thoroughly before using. Do not let set for a time and use without shaking or it will leave the oil on the foliage in to direct amounts.

SMITH BRONX SPRAYER: It is necessary in using N.N.O.R. spray to have a clean sprayer and one that will throw a hard penetrating spray to drive the spray into the plants, so all insects will be thoroughly wet, the main purpose is this as most insects breathe through their skin, and can withstand insecticide if not thoroughly wet. For this purpose we have listed the Smith Bronx Sprayer, unexcelled for spraying plants in the greenhouse, home, and even out of doors. Sprayer is made entirely of brass, nickle plated. Nozzle throws powerful, broad mist spray with slow, easy pump stroke up and down.

Order No. 8Q Bronx (quart size) \$2.25.

In case of breakage we can replace bottle at 30c each.

FERTO POTS: Start vegetable plants in these pots in spring, set directly in ground. Retains moisture and supplies fertilizer to the plant. We are selling this line out and will handle another line of fertilizer so we are offering a bargain price on these while they last. 2½" size \$1.75. 3" size \$2.25.

COW MANURE BRICKS: Each brick makes 16 qts. liquid fertilizer. Crush brick before adding water; use full strength. Each 20c; 8 @ \$1.50. This while they last.

When these are sold out we will fill orders for this material with pure shredded cattle or sheep manure, in proportion by weight or by worth. You will get the same value.

SHREDDED MANURE: In using this material put scalding water over it; in this way all insects will be removed. Use only enough to color water for plants. 5 lbs. 50c; 10 lbs. 95c.

HYPONEX: a safe fertilizer for all plants when used as directed. 7 oz. 50c; 1 lb. \$1.00.

PLANT LABELS: painted wood labels. 4"x5/8" 50 per hundred; 6"x5/8" 65c per hundred.
